Save the date!

Artificial intelligence meets biology

What

- Workshop: AI prediction of genomic elements.
- Presentations: investigators who use AI in biological research.
- Debate: the impacts of AI in academia, science, and education.

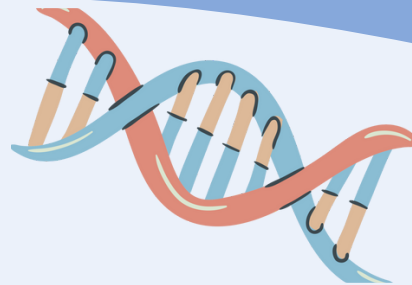

When

November 14th - 1pm to 5pm (CHEB 170)
November 15th - 9am to 4pm (CHEB 140/150)

Where

Collaborative Health Education Building (CHEB)
5793 University Avenue
Dalhousie University

Join us for a day and a half event where artificial intelligence intersects with biology.

Stay tuned for registration, complete agenda, and more details!
